K & W Products, Inc. RL30 Big Roll Harvester
is built to use with a 45hp tractor *not requiring* front weight package.

Other features include:

- A full floating head producing a more even harvest
- 100% self-contained hydraulic systems (*no need for tractor remotes*)
- Gear reduction, two-stage 540 PTO pump allowing lower rpm
- Rear-mounted hydraulic levers allow ground man to clamp tube and lift sod roll; rear-mounted toggle-switch operates depth control
- Built with production and longevity in mind
- Optional Electric Counter (*counts preset footage, signals operator to stop by sounding horn*)

The RL30 is the safest, most affordable ground driven roll harvester produced. Visit us at www.kwproducts.net to view a video of our harvester in action, or call us at **(866) 235-5673** toll free for pricing or any more information you may need.

Gear reduction hydraulic pump

Allows for more flow at lower RPM

Full Floating Head

Maintains a more even harvest on uneven fields

Electric depth control

Changes thickness of blade on the run

Rear hydraulic panel

Provides the ground operator with controls to

- Adjust head speed
- Clamp tube
- Lift roll
- Adjust thickness of cut
