BIG ROLL SOD HARVESTER

ROLL AFTER ROLL, YEAR AFTER YEAR!

The Most Rugged, Reliable Sod Harvester In The Industry!

For over 15 years, the WMI Big Roll Sod Harvester has been field proven for rugged reliability and to be the lowest maintenance sod harvester in the industry, harvesting the weakest grass no matter what your soil conditions!

Whether wet, dry peat, clay or rocky ground, this harvester will operate flawlessly, and out-perform any other harvester in its class.

This unit is user-friendly with a 3-point hookup, PTO pump driven with netting attachments and depth control. It's unique design creates a tight roll!

With WMI's dedication to the turf industry and our continuous strive to satisfy our customers, we have added an additional rear-mounted clamp control.
